Healthmark Announces Mesh Style Tip Protectors to ProSys Product Line

Fraser, MI, June 4, 2015 - Healthmark has announced the addition of Mesh Style Tip Protectors to their Prosys line of products. These lightweight, yet durable single use tip protectors are perfect for instruments that require low temperature hydrogen peroxide sterilization. The Mesh Style Tip Protectors have been validated for use in both Sterrad® and V-PRO® brand low temperature sterilizers (not steam sterilizable).

The Mesh Style Tip Protectors are available in two styles; The open ended tip protector is ideal for products like flexible endoscopes and the closed ended option help protect delicate tips on instruments such as the rigid endoscopes. Both styles of tip protectors can expand due to their mesh material design and accommodate a wide range of sizes and configurations.

For more information about the Mesh Tip Protectors go to: http://www.hmark.com/meshtips.php?pmc=MTP-PR
