

Instructions for Use: Steriking® Heat Seal Pouches

Brand Name of Product	Steriking® Heat Seal Pouches (manufactured by Wipak)
Generic Name of Product	Pouches
Product Code Number(s)	24, 2, 4, 25, 3, 5, 8, 19, 12, 27, 15, 6, 26, 13, 28, 33, 7, 7A, 10, 16, 29, 30, 14, 21, 31, 32,
	B35, B30, B31, B36, B37, B34, SDV10, SDV20
Purpose of Product	The STERIKING® heat-sealable pouches are intended for use as packing material for
_	sterilization of items by steam or ethylene oxide gas.
Range of Applications for Product	N/A
Key Specifications of Product	The STERIKING® see-through packages are constructed of paper-laminate that is heat-
	sealed together with a multiply PET/PP-plastic laminate (12/50 microns).

Shipping & Storage		
Shipping Conditions & Requirements	N/A	
Storage Conditions for Unprocessed Pouches/Rolls	 When stored in the original packaging: No special conditions are required. Closed transportation packaging items are protected from moisture, heat, and direct sunlight or other sources of UV light. Once the pouches and rolls are removed from the packaging, recommended long term storage conditions are: Temperature: 18- to 24 °C (64.4- to 73.4 °F) Humidity 30- to 60%. 	
Shelf Life of Unprocessed Pouches/Rolls	 It is recommended that the pouches/rolls are used within five (5) years of production. The recommended "best before" date and the manufacturing date are stated on the carton label. Each pouch/roll has a lot number imprinted for traceability. This can be used to determine the manufacture date. 	

Instructions for Using Product		
Description of Use(s)	The STERIKING® see-through, heat-sealable pouches are intended for use as packing	
	material for items for sterilization by steam or ethylene oxide gas.	
Preparation for Use	1. Before sealing, remove as much air as possible from the pouch. This will help prevent rupturing during sterilization.	
	2. Place the proper type of indicator inside the pouch, according to your facility's guidelines.	
	3. Ensure that pouch contents and the indicator are away from the seal area and will not get caught in the seal. Confirm the temperature setting on the heat sealer is appropriate for paper-laminate pouches.	
	4. Recommended sealing temperature for final closing is 165- to 200 °C (329- to 392 °F) depending on pressure and time.	
	5. Seal the pouch securely.	
	6. Leave enough space beyond the seal for the opener to easily grasp (usually ½-inch to two [2] inches). (NOTE: If it is a newly designed pouch, seal along or below the dotted line.)	
	7. Rubber bands, non-approved tape, safety pins, paper clips, staples, or other sharp objects should not be used to secure packages or to organize the contents.

Reprocessing Instructions	
Point of Use	N/A
Preparation for decontamination	N/A
Disassembly Instructions	N/A
Cleaning – Manual	N/A
Cleaning – Automated	N/A
Disinfection	N/A
Drying	N/A
Maintenance, Inspection, and Testing	N/A
Reassembly Instruction	N/A
Packaging	N/A
Sterilization	Compatible with steam and EO sterilization.
	Pre-vacuum sterilizer—for:
	o Four (4) minutes at 132 °C (270 °F).
	o Three (3) minutes at 135 °C (275 °F).
	• Compatible with Gravity Steam Sterilization: 30 minutes at 121 °C (250 °F).
	Be sure to arrange pouches in such a way that there is minimal to no contact
	between pouches. If touching, arrange so that paper side is facing paper side.

Disposal

Storage for Sterilized Pouches/Rolls	Recommended long term storage conditions:
	o Temperature: 18- to 24 °C (64.4- to 73.4 °F)
	• Humidity: 30- to 60%.
	 Do not exceed 40 °C for storage.
	 Facilities should develop a policy identifying events that may compromise the
	sterility of packaged items. This could include a maximum time period for
	storage.)
Additional Information	 The products are for single-use only.
	 Maximum tested sterilization time: 30 minutes.
	 Maximum tested temperature: 135 °C.
	 Validation testing performed for single and double pouching.
	 Sterilized pouches were tested to 5 years of accelerated and real-time aging.
