**Healthmark Industries introduces the Quality Audit Tray Label to its Labeling product line**

March 28, 2023, Fraser, MI - Healthmark Industries is delighted to introduce the Quality Audit Tray Label to its Labeling product line. Designed to help sterile processing departments (SPDs) track and trend quality defects with instrument trays, the white 8.5L x 2.5W Inch self-looping Quality Audit Tray Label allows the end-user of instruments to report an observed tray defect by making a tic mark in the corresponding check box, which is then returned to SPD leadership for tracking and quality improvement purposes.

The front portion of the single-use polyethylene label allows staff to document critical information including the doctor's initials and name, as well as the operating room number and identified problem. The back portion of the label features a space for healthcare workers to adhere an instrument tracking label. The Quality Audit Tray Label is available for purchase in a case of five hundred.
