Healthmark Offers New UnderGuard Dry™ Advanced in Moisture Management Product Line

Fraser, MI March 27, 2024 - Healthmark Industries has announced they are now offering UnderGuard™ Dry Advanced. They recently added it to their Sterilization product line.

Specially designed for moisture wicking, the non-linting UnderGuard™ Dry Advanced helps to prevent tears in wraps, as well as to protect instruments internally.

The UnderGuard™ Dry Advanced liner provides optimum protection from dust, moisture, and handling, while simultaneously providing an absorbent inner layer for the dispersion of condensate during the autoclaving process. This liner is particularly useful for the protection of barrier-wrapped heavy plastic boxes and trays, as well as standard stainless-steel baskets. The unique purple and green colors distinguish the UnderGuard™ Dry Advanced from sterilization wraps. The UnderGuard™ Dry Advanced is offered in 6 different sizes and available in either purple or green.
