### **Healthmark Now Offers SafeStep - ATP Monitor**

April 19, 2024 Fraser, MI - Healthmark, a Getinge Company, is now offering the SafeStep - ATP Monitor.

HAIs, healthcare-associated infections continue to flourish, despite dedicated efforts to reduce them, potentially compromising patient and staff safety throughout your facility. Biofilm, bioburden and contaminants can be found everywhere from the CSSD to the OR.

Everything - from a light, in an operating room; a partition curtain or chair in a patient room; a clipboard, exam glove or an endoscope can be invisibly hazardous and pose a potential threat. Is it clean? Be sure in just 15 seconds an essential step to improving your HAI prevention and safety protocol. The SafeStep ATP Monitor verifies the cleanliness of surfaces, endoscopes and cannulated instruments in just 15 seconds. By detecting ATP (adenosine triphosphate) – the energy molecule found in all humans, animals, plants, bacteria, yeast, and mold cells. SafeStep gives you the testing power to minimize HAIs and improve patient and staff safety!
