

Healthmark Academy

EMPOWERING THE HEART OF THE HOSPITAL

2-Day On-Site Audit Prep

A standards-based assessment with real-world application

What the program is all about

The 2-Day On-Site Audit Prep is a tuition-based program designed to help sterile processing departments prepare for regulatory and accreditation surveys before official surveyors arrive. A Healthmark Clinical Educator partners with your team in a collaborative, educational way to identify gaps and vulnerabilities. The review is guided by national standards and professional guidelines, such as AAMI ST79.

How we'll work together

The program is conducted as a partnership, not an inspection. Together, we'll review key areas of sterile processing, identify strengths, and uncover opportunities for improvement. Your team will receive a confidential, detailed report with practical recommendations to boost quality, efficiency, and confidence. Scheduling is flexible, designed around your facility's needs and your team's availability.

Take the Next Step

Scan here or visit academy.hmark.com to learn more. From there, you can request details, and our team will reach out to discuss availability and tailor the program to your facility.

How will this program benefit your SPD?

Strengthen Compliance

Ensure your processes align with industry standards and guidelines.

Elevate Team Knowledge

Translate regulatory and industry standards into relatable, digestible, and actionable steps.

Gain Actionable Insights

Receive a confidential, detailed report with practical steps for improvement.

Improve Quality & Efficiency

Identify process gaps that may impact patient safety or productivity.

Build Confidence

Know your SPD is prepared to meet standards and pass inspections.
